

Access Monitoring 2011

Many Bay Lake neighbors are helping guard against nasty invasive species finding their way into our lake by volunteering to monitor boats on our one public landing. If you haven't seen or heard what devastation zebra mussels can have, Google "Zebra mussels" and see what's happening at Mille Lacs (or click in the Zebra Mussels Flourish In Mille Lacs box in "What's New" on our Home Page).

We are very grateful to all the volunteers listed below, each of whom has served one or more shifts monitoring boats. However, we are ever in need of more volunteers to help cover more daylight hours.

A two hour training session will be scheduled early next summer. **To be on the mailing list for the training, contact me at 415-497-2838 or philfishing@gmail.com.**

Phil Rollins, BLIA Access Monitoring Committee Chairman

To join this fun loving and community minded group contact:
